

NEUTROCORK®

The clean technical cork

NEUTROCORK® is a unique cork and the latest result of a novel manufacturing approach in the cork industry.

Premium cork granules are treated with excessively hot vapour, a procedure required by the ROSA treatment developed by AMORIM scientists. This vapour treatment effectively reduces TCA (2,4,6-Trichlor-anisol), the main culprit for corky, musty tastes.

Having been thus cleaned, the granules are used to manufacture NEUTROCORK®, a cork that is inexpensive, safe and neutral in that it does not in any way affect the wine's original flavours.

NEUTROCORK® is available in two sizes:

38 x 24 mm 44 x 24 mm

Great offer for many reasons:

- ✓ TCA-free granules thanks to ROSA –procedure
- ✓ medium storage capacity up to 5 years
- ✓ 24mm-diameter enhances sealing of bottles

OTR- Rate: (Oxygen transfer rate)

12 months	1,20 mg/cork
24 months	1,30 mg/cork
36 months	1,40 mg/cork

Technical Specifications:

Length:	+/- 1,0 mm
Diameter:	+/- 0,4 mm
Specific weight:	240-320 kg/m ³
Moisture:	4% - 9%
TCA-content:	≤ 0,5 ng/l
CO ₂ -retention:	392g/ cork

For further details please visit also www.schiesser.at

*) releasable TCA content at or below the 0,5ng/l quantification limit; Analyses performed in accordance to ISO20752
