

T-BAR STOPPERS

The fact that the demand for T-Bar stoppers is still increasing has decided us to expand our stock with a couple of widely popular T-Bar stoppers. The cork used for the stoppers is being produced from corkwood of the highest quality. A food-safe adhesive agent firmly and permanently joins the cork to the wooden top.

Bottlenecks often vary in size. This is the reason we offer T-Bar Cork stoppers in several different diameters: 11, 14, 17, 18, 19 and 20 mm.

In addition, we stock T-Bar Cork stoppers made of solid natural cork without wooden top. These stoppers are produced out of just one piece of cork and are stocked in these diameters: 18, 19 and 20mm.

Great offer for many reasons:

- ✓ As emblems of quality T-Bar Cork stoppers will also enhance your spirituous beverages
- ✓ No breakage if used with diameters appropriate for your bottles
- ✓ TCA-tested product

CONICAL & BARREL CORKS

Apart from T-Bar Cork stoppers, we stock a huge selection of conical and barrel corks. Let us know the type of the bottle and size of the wine barrel and we will offer you appropriate conical stoppers of outstanding quality.

Conical corks are still used in large varieties and numbers in the chemical-pharmaceutical industries as well as in all kinds of laboratories.

Great offer:

- ✓ Orders of 5,000 or more pieces include production of conical corks to your specifications.

Technical Specifications:

Can be submitted on request for individual corks
